

THE OYEN NEWS

Vol. 16, No. 44.

OYEN, ALBERTA, WEDNESDAY, JANUARY 1, 1930

PAGE ONE

1930

In extending thanks to our customers for their business during the year just ended, we take this opportunity to express our keen appreciation of the pleasant relationships we have enjoyed.

May the New Year bring you Health, Happiness and Prosperity.

J. L. ACHESON
EVERYTHING IN HARDWARE

1930

Commencing the New Year calls to us a better appreciation of old associations and the value of old friendships.

May 1930 be the Happiest and most Prosperous New Year you have ever known.

E. MacArthur
and staff

1930

As we step out on the threshold of a New Year, we look back with pleasure to the happy business relations we have enjoyed, and take this opportunity to wish you and yours Happiness and Prosperity throughout 1930 and the years to come.

The People's Meat Market

1930

Extending to the people of Oyen and District our appreciation of the cordial business relationship we have enjoyed in the year just closed. May 1930 be to you a year of great Prosperity.

W. V. MILLER

Win Grand Challenge Cup

Following their victory in the Eastern Lines championship of first-aid teams of the Canadian Pacific Railway, the Windsor Station police team, of Montreal, carried off the Grand Challenge Cup for all first-aid teams on the Canadian Pacific system, defeating a team from Nelson, B.C., winners of the Western Lines championship, in the all-lines final at Ottawa recently. The Montreal team obtained 150 points out of a possible 275, and Nelson received 153. The trophies were presented by Hon. Hewitt H. Bostock, P.C., M.A., Speaker of the Senate, at a

pleasant informal dinner. The teams were judged by Colonel Charles A. Hoggins, C.M.G., V.D., M.D., D.P.H., director of the St. John Ambulance Association, Canadian Branch. Above is the Montreal police team, left to right, standing: Constables E. G. Wykes, A. H. Slott, and O. Tomlinson; sitting: Constable W. H. Allison, (captain of team), C. G. Miller, first-aid instructor for Eastern Lines, and Constable W. W. Peterson. Individual cups, donated by Dr. H. A. Beatty, chief surgeon and medical officer of Canadian Pacific, were presented to all members of the team.

Sixteen Year's Progress

While Oyen has much to be proud of in looking back over its achievements, it is well, on the threshold of a New Year, to look to the future and plan for further expansion and advancement. Nineteen-thirty presents great possibilities for this community and any foresighted and aggressive policy that will enhance a healthy growth of the town and the betterment of the district in general, should and will no doubt receive the wholehearted support of all progressive citizens.

With the possibility of some very active oil development work in the Fuego field south of town, and the organization of new Companies with holdings adjacent to the Fuego field Oyen is very favorably situated, and never before in its history has it been in a better position to go forward in steady and substantial growth. There must be no diminution of that fine spirit of co operation and willing effort on the part of a great number of citizens which has been manifested in its past achievements.

The present council is taking a keen interest in town development and beautification and no doubt will formulate an active policy for 1930. The News understands that it is giving careful consideration to data recently received on the above subjects.

They say that municipal pride is at its best when a town begins to worry about its traffic problems. In this connection the News recommends for consideration the erection of three silent policemen on Main Street at the intersections of Railway Avenue, First Avenue, and Second Avenue.

The Oyen News

Henry McDonald Opens New Hotel at Bindloss

Mr. Henry McDonald formerly of Oyen and of recent years of Bindloss, has opened a new hotel in Bindloss. The News is informed that the new building is equipped with every convenience possible for the comfort of guests, and under the capable management of Mr. McDonald, will no doubt win the favor of the travelling public as well as local guests.

In connection with the opening of the new hotel a dance was held in the Bindloss community hall on New Year's Eve.

New Year's Eve Dance Draws Large Crowd

The big "whoopie" New Year's Eve dance, held in Oyen Theatre last night, was well attended and much enjoyed. Noise makers of various kinds and a profusion of streamers given to the dancers just before the New Year, made riotous fun. This annual event at the theatre is proving a very popular affair.

1930

We take this opportunity to thank you for the support given us this past year. Our sincere wish is that 1930 may be a happy and prosperous one for you. We trust our service will warrant a continuance of your patronage and during the coming year we will continue to uphold our standard by giving you the best goods and best service.

"The Last Warning"

The management extends to One and All their good wishes for Prosperity throughout the New Year.

Looking To The Future

New York Sky-scrapers To Have Mast For Druggists

Alfred R. Smith, skyscraper builder, has announced that the 1300 foot tower of the Empire State building will be surmounted by a 200 foot mooring mast for Zeppelin airships through which passengers can descend in seven minutes to the street, instead of landing at Lakehurst, 70 miles away.

Mr. Smith is due to Washington to ask Secretary of the Navy Adams for the help of navy engineers experienced in mooring mast construction. Already, Shreve, Lamb and Harmon, architects of the 85-story building, have consulted the engineers of the Goodyear Zeppelin Company, which contemplates transportation lines with the two great airships it is building.

The directors of Empire State, Inc., of which former Governor Smith is president, have come to the conclusion, an asset that in a comparatively short time there would be a trans-Atlantic, trans-Pacific and transcontinental airship lines, and possibly a line to South America.

THOUSANDS OF MOTHERS USE NO OTHER MEDICINE

Baby's Own Tablets Are the Ideal Remedy For Babies and Young Children

Canadian mothers are not for the first time giving their little ones the benefit of the baby's own medicine. The booklet for a remedy which is effective and safe for the mother and child. Thousands of mothers have found such a remedy in Baby's Own Tablets and for the ailments of their little ones. Among them is Mrs. Howard King, of Truro, N.S., who says: "I have been recommending Baby's Own Tablets to mothers of young children. I know of nothing to equal them."

Baby's Own Tablets are sold by medicine dealers in Canada. Write for a box from The Dr. Williams Medicine Co., Brockville, Ont.

Fish Fry Transported To Stock Western Waters

Over Five Million Fry Deposited In Western Waters During Past Year

There should be a lot of good sport fishing in Western Canada waters in a few days. A report issued by the Canadian National Railways shows that during the current year a company transported 5,382,000 fish fry or eggs for deposit in waters in Western Canada. Pickled and the following varieties of trout were included in the shipments: Loch Leven, golden brown, salmon, rainbow and Kamloops. The pickled were laid in canisters in prairie waters and the trout in mountain and foothill waters.

Miller's Worm Powders will drive worms from the system without injury to the child. The powders are so easy to take they remove the worms that cause the pain, and thus the suffering of the child is relieved. With no straining or need to hold one's breath under an hour from worms.

Hotel Cecil Is Sold

Famous London Hostelry Purchased By Oil and Gasoline Corporation

The Hotel Cecil, one of the most famous landmarks between the Strand and the Thames for the last 30 years, and patronized especially by overseas visitors, has been sold to serve as headquarters for a great oil and gasoline corporation. The purchase price was about \$7,000,000.

The Hotel Cecil's disappearance is another proof of the tendency of all enterprises catering largely for visitors, both in amusement and accommodation, to move further westward in the city. The hotel possesses 900 bedrooms and eleven banquet halls, being the creation of a notorious financier, James Balfour, who was brought back from refuge in the Argentine to suffer long imprisonment. The hotel was only partly built at the time of Balfour's crash. During the war it was the headquarters of the Royal Air Force.

"Where have you been?" "In the hospital getting censured." "Censured?" "Yes, I had several important parts cut out."

BORN'S Corn Extractor

Light Right Off No Pain

"John, you have been drinking my brandy." "I have not sir." "Are you quite sure?" "Quite sure. I could not get the cork out."

The commissioner stated that the new regulations governing fur trade in the province seems to be proving satisfactory. The number of trappers now working in the north has shown a substantial increase over the 1928 figure, Dr. Elliott asserted.

"John, you have been drinking my brandy." "I have not sir." "Are you quite sure?" "Quite sure. I could not get the cork out."

Interesting Film Letters

Valuable Historical Documents Are Received By Dominion Archivist

Collectors of historical Canadian documents would probably give considerable for those that have recently come into possession of Dr. A. G. Doughty, Dominion Archivist, consisting of letters to and from "President Louis Riel, of the North West Territories," written in March, 1870, at the time of the Riel Rebellion.

These documents include interesting copies of acts passed by the first session of the first legislature of Rupert's Land, of which Louis Riel was president, one of them being an act to establish a military force. There was to consist of 50 men to be raised by the Dominion, and their monthly wages were set at \$15 and board.

There are many interesting documents in the collection Dr. Doughty obtained from Mr. R. G. Doughty, a relative of a British soldier who apparently joined the Riel forces in the home and elsewhere during the rebellion.

"I was very fortunate in obtaining this collection of old letters and copies of acts, and it is a striking example of how old and historic documents would be found in the most unexpected places," he said. Riel's proclamation prior to the rebellion, under the caption of "The List of Rights," set forth the reasons for the upheaval which came to be known in later years as the North West Rebellion. A copy of this important document, also the first act passed by the North West Territories legislature, with the letters in question, old and faded, but still decipherable and written in French and English, now reside in the Dominion Archives, packed into a book. They are considered exceedingly valuable by Dr. Doughty.

Advocate Canadian Type of Architecture

Creation Of Travelling Scholarships

Institution of Dominion travelling scholarships as a means of encouraging a spirit of emulation among architects of the schools of Montreal and Quebec under governmental auspices, and those at the universities of McGill, Toronto and Manitoba.

The creation of travelling scholarships would be the first method to bring this about, he believed, and as the initial step he suggested a scholarship at the British school in Rome. In seeking to fulfil their ambition for a type of architecture in Canada, those of the profession were at present toying with modernity and interesting themselves less with the severe traditionalism so actively compelling in pre-war days, the lecturer declared.

Cramped His Style

Old Mose Parker was pretty tick, and the darkey doctor promptly put him to bed and then administered rules and regulations as to sleep and diet. After he had gone, Mose foined to his wife and complained: "Mandy, how does that dere fool doctor reckon Ah's gwine to eat bread on chicken every day if Ah ain't got ma ebber's free?"

The population of the earth is said to double itself every 250 years.

Nearly 4,000 tons of lilies were used in China, this year, to make soup.

That Sore Throat Means Minard's.

Complete Broadcasting Circuit

Canadian National Forces Last Link In Coast To Coast Radio Chain

By the completion of a broadcasting circuit from Edmonton to Vancouver, the Canadian National Railways have forged the last link in a coast-to-coast chain of radio stations. Announcement of the installation of the new circuit was made recently by the telegraph department of the system. The first broadcast took place over the new section took place on Thursday, December 19, when the Hart House String Quartet played before the microphone at Toronto. Up to the present, the Rockies have been a barrier against consistently good reception of eastern radio broadcasts, but now Pacific coast listeners will be able to hear the best stations of the other centres of Canada. Contact between all parts of the Dominion may now be maintained by the medium of instantaneous transmission of speech. The vast radio network is an engineering feat which keeps pace with the progress of both Canada and the National system. The radio department will broadcast three hours weekly over the Atlantic-Pacific network and plans are underway for several commercial programmes to reach the coast.

Pocket Screen Stops Noise

Russian Invention Boon To People Who Like Quietude

A pocket screen to shut out noise is the invention of Leon Theramin, a Russian inventor. With this invention in his pocket, the peace-loving man could rule all day through the busiest streets and yet enjoy the profound silence of a cathedral.

The "Russian Edison" has found that the principle of the ether-wave music instrument can be applied successfully in numerous other fields. He prophesies that adaptations of the electro-magnetic field will be of great significance in industry as well as in musical circles.

He also has provided for Theramin's orchestra. To make it possible for musicians to play his instrument in unison he has prepared a scale of colored lights to ensure even tone. He maintains that after wave music is easier to master than any other musical medium.

James O. Steel Steel houses, complete in every detail and including a bathroom, electric lights and central heating, are being planned for Paris. The houses can be constructed in eight minutes and can be erected on their sites in a few hours.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them happy.

Some people are hard to please. They are always looking for trouble and are not satisfied when they find it.

A golf club has been invented which whistles when a drive is made correctly.

Minard's for the Ideal Rubdown.

ZAM-BUK Beats Any Embrocation In Winter Aches & Pains Try a Box To-Day!

While Zam-Buk has long been recognized as Canada's most popular remedy in skin troubles, how many know how better it is than any other remedy for relieving the sharp twinges of rheumatism, sciatica or lumbago? Zam-Buk is equally good for aching backs, stiff joints, sore muscles, colds in the head and chest, or sore throat. Rubbed well into the affected parts, Zam-Buk's powerful pain-killing essence acts right into the tissues, banishing soreness, congestion and inflammation. Others prefer to treat their colds up; they rub Zam-Buk between the palms of both hands and then inhale the exsaporating medicinal balsams. This does the same good in another way.

Also for COLD SORES 'CHAPS' CHILBLAINS, etc.

Diet Business Is Serious

So Many Theories As To What a Person Should Eat

Something has got to be done about this dieting business. Time was when a fellow could sit down to a meal and think he knew what it was doing. But now, the time has come when many theories as to what it will do to him that he can hardly muster courage to do anything but drink. No more diets by various friends, he connects, he knows that somewhere there is a diet expert who believes it will induce sleepless nights, absence, wear and tear, general depression. His head swims as he thinks of the theories which have been earnestly laid out. He has not been a friend, he has theory positively based on the authoritative word of Doctor So-and-So, a very big man, of Doctor Such-and-Such, positively one of the biggest men in the country—Harper's Magazine.

Sale Of Farm Seeds

Disposal Of Pedigreed Seeds Is Satisfactory

A business that is expanding rapidly in Saskatoon is the sale of farm seeds. It is estimated that the sales of pedigreed seed in the city has increased at least fourfold in the last five years. And there is still room for further expansion. "Five years ago," says Mr. Speers, "about 10 per cent of the farmers knew what pedigreed seed was, and how it was procured. Now perhaps 50 per cent. have that information."

The Proven Ankle Remedy. Since the ankle has been so long a lack of much heralded remedies, but they have proved short lived and worthless. The ever-growing reputation of Dr. J. D. Kellogg's Ankle Remedy in the field of medicine which no other can compare with. It has not been pushed by sensational methods, but has simply gone on effecting relief and making converts.

Exports of ostrich feathers from South Africa in past years have amounted to \$15,000,000 annually.

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

Reduce Armies As Well As Navies

The outstanding event of this opening month of the new year is the assembling of the naval conference in London, England, upon invitation of the British Government to the other Great Powers, to devise ways and means of securing a substantial lessening of the burden borne by all in maintaining huge navies, while at the same time, they are mutually pledged the one to the other and to all not to resort to war. The conference opens with every prospect of success attending its deliberations, and particularly so in view of the fine understanding already reached between Great Britain and the United States. The hopes and desires of all mankind are wrapped up in its success.

If an accord can be reached in regard to questions of naval strength the next step should, and undoubtedly will, be an endeavor to arrive at an agreement for the reduction of armies and other forms of land armament. It is a preparatory step, so called, as distinct from naval establishments, imposes an even heavier burden on most nations. Nevertheless, the question of the size of armies seems to present the more difficult problem.

For example, here in Canada we can understand why the United States, with the Atlantic and Pacific, and Gulf of Mexico bordering it on three sides, with its island possessions of the Philippines, Porto Rico, etc., and its oceanic trade, should be so anxious to have a large standing army. It is not that our people are at a loss to understand their need of a large standing army and an extensive National Guard or militia.

Following, as it did, the cordial reception tendered Premier Hanesby MacDonald by President Hoover, the visit to the United States of the invitation to the naval conference in London, Mr. Hoover's Armistice Day speech came as something of a shock in that he laid great stress, many people believe, "on the old gospel of preparedness and particularly as it applied to the United States in this feeling against President Hoover's first budget message to Congress, wherein he asks for increased appropriations for the army."

President Hoover's statement that sufficient forces must be maintained to prevent "the foot of the invader landing on our sacred soil," sounded like a sop to the militarists. There does not appear to be the vaguest possibility that any power or combination of powers contemplates any such fantastic step or that it is ever likely to happen. Canada and Mexico are the only two countries whose territory is contiguous to the United States, and this Dominion's permanent forces of approximately 5,000 does not constitute a threat, nor has the U.S. anything to fear from Mexico. Why, then, such huge army expenditures?

President Hoover has taken a fine stand on naval reductions and also on the Kellogg anti-war pact, but if real progress is to be made towards world disarmament an even greater measure of enthusiasm must be displayed for reduction in land forces. In his address he referred to the fact that there are ten million men under arms in Europe, vastly more than in 1914. But, instead of attempting to formulate some plan whereby a reduction in these immense forces could be effected, Mr. Hoover seemed chiefly concerned in having the United States build up a bigger army to avoid invasion by these overseas millions.

Real friends of peace would have liked to hear President Hoover issue an urgent call to European countries to immediately start cutting down their armies, and instead of advocating a still larger army for his country, he could safely have added weight to his plea by favoring a reduction, rather than an increase, in the United States land forces. The war-weary peoples in all countries would have welcomed such a lead from the United States.

Apparently the lesson that preparedness for war inevitably leads to war has not yet been sufficiently impressed upon the minds of the people. An enormous percentage of the four billions of dollars which Mr. Hoover asks Congress to provide for the army, is to cover the cost of fortifications, and to "prepare" for possible future ones. In 1928 the United States spent sixty cents out of every dollar on account of war financing. Another twenty cents went to the U.S. Treasury, making a total of eighty cents out of every dollar collected in federal taxes for military—and, in an economic sense, unproductive—purposes.

In that same year in Canada, a pacific nation, spending far less than other countries on war preparation and debts incurred by war, heavy as the latter are, 45 1/2 cents out of every dollar expended by the Government was attributable to war.

In the light of these figures it is clearly evident that, if this damnable doctrine of "preparedness" is to be allowed to continue as the basis of international relations, all the efforts of the League of Nations, All Peace Pacts, all efforts of peace organizations will fail. The people must bestir themselves in order to avert the possibility of future wars.

An Extensive Collection

Man Speculated At Number Of Edgar Wallace's Books

A man recently went into an English library and asked for the complete works of Edgar Wallace. The librarian, he said, "was extraordinary. A whole squadron of men marched in to the reading-room with long steel rods over their shoulders. Clamped to these rods were rows of Edgar Wallace's books, in volumes. They were no of the long poles which vegetable sellers carry, with onions slung on to them." He said that there must have been all in all something like 200 books.

RADIO QUESTION TO BE REFERRED TO COMMITTEE

Ottawa.—The question of nationalizing radio broadcasting in Canada will probably be referred to a parliamentary committee during the forthcoming session. While no definite announcement has come from government sources the importance of the matter has led to the conclusion that the whole subject of radio will come under review by a special committee of the House of Commons.

The chief recommendation of the Royal Commission on radio broadcasting which concluded its labors last September, was that broadcasting should be placed on a basis of public service and that stations should be owned and operated by one national company.

The recommendations included the creation of high power stations to give good reception both day and night throughout the entire settled area of the country. The suggested number of such a system is several 50,000 watt stations. Radio engineers agree this would give Canada the most powerful chain of stations in the world.

Showered With Greetings

Prime Minister Receives Christmas

Ottawa.—How many Christmas cards did you get this year? Premier Mackenzie King did fairly well. He received several hundred. The exact number has not been revealed, but Christmas cards have of late been added to historic Laurier house by the sackful.

Merely to read the kind messages from his friends and well-wishers in all parts of the world was a prime minister exceedingly busy. It is a labor of love, however, Mr. King is a lover of Christmas cards. Among the greetings which the prime minister has received is a very kind, personal message from "Her Majesty the King and Queen."

Sea Musical Festival

Interesting Event To Be Held At Cards By The Sackful

Victoria.—The second annual sea musical festival will be held at the Empress Hotel, Victoria, January 15-18. Handicrafts of the Pacific coast will be shown, music lovers will be delighted with the Sea Music of All Nations, chantes of the Old Salting Days, Salter's Horripops and Fisher-Folk Dances.

The second annual mid-winter golf tournament will be held at the Wood Golf and Country Club, Victoria, from February 17 to 22. Free booklets describing these events may be had upon application to the manager of the Empress Hotel, Victoria, B.C.

Boy Killed By Coastguards

Was Crossing Niagara River
Buffalo, N.Y.—Shot by coastguards while cruising in a small boat at the foot of Genesee street, this city, Eugene Downey, 27, son of Police Lieutenant Eugene F. Downey, died in a hospital less than an hour later. Downey was speeding across the Niagara River in a motor craft, and, according to authorities, failed to stop in answer to a command from the coastguardsmen who opened fire with a machine gun. A bullet struck Downey in the abdomen. No liquor or narcotics was found in his car.

Student and Pilot Crashed

Springfield, Mo.—The struggle of a student flyer and his instructor for the airship of an airplane, was blamed for the deaths of both. Samuel Bartel, thirty-five, who was an army pilot during the world war, and B. D. Allen, of Mountain Grove, Mo., were fatally injured when the dual-control biplane, they were flying, fell near Accoomod, Mo.

To Aid Unemployed

Edmonton, Alberta.—Provincial and city authorities will co-operate to provide work for unmarried jobless men in Edmonton, with the province bearing the expense, it has been announced following a conference between Premier J. E. Brownie and Mayor J. M. Douglas.

Accidental Shooting

Edmonton.—Accidentally shot in the face by a 22 rifle in the hands of his 13-year-old brother, James Pugh, 17, resident of the Canmore District, is now in hospital with a fair chance of recovery.

W. N. U. 1518

Date Announced For Freight Rate Hearing

Appeal Of Western Provinces To Be Considered, January 16

Ottawa.—The cabinet has announced that the freight rate appeal of the western provinces will be heard on January 16. The hearing was to have been held several weeks ago but was adjourned.

The appellant provinces are British Columbia, Alberta and Saskatchewan. Originally these provinces had agreed upon their case, which included the removal of the mountain differential and a revision of the west-bound terminal rates. Now, however, Saskatchewan has withdrawn from the other two provinces and has submitted a separate appeal. This appeal has not, as yet, been made public and it is presumed here that it will be released for publication at Regina.

Chinese Foreign Policy

Would Abolish Foreign Navigation Rights Along Coasts and Inland Waters

Nanking, China.—Foreign Minister Wang, in a speech before the parliament of the nationalist government for 1930, has declared that the work of his ministry during the coming year will be devoted to the abolition of foreign navigation rights along the coasts and inland waters of China.

In addition, Mr. Wang hoped to secure the withdrawal of foreign troops on Chinese soil and the retrocession to China of foreign concessions and settlements.

He added that on Great Britain's initiative, provided to the abolition of the extrajurisdictional rights made for revising the Sino-British treaties, forwarded to London.

Speech To Be Broadcast

All May Hear King George's Address At Naval Conference

London, England.—Plans are being made to broadcast the King's speech at the opening of the five-power naval conference between 11 a.m. and 1 p.m. on January 21, from the House of Lords, immediately after the reading of the King will surrender the chairmanship of the conference to prime minister MacDonald.

The entire two hours of the broadcast which will be between 6 a.m. and 8 a.m. Eastern Standard Time will not be occupied by the King at this time was allotted in the hope of including the introductory speeches of delegates from other countries.

Suspects Are Arrested

Eighty Natives Apprehended In Connection With Bombay Outrage

Lahore, India.—Eighty natives were arrested in connection with the bombing of Lord Irwin's train at Delhi.

They were taken into custody at the camp of delegates to the National Congress. A force of 500 former soldiers and police officers were recruited and ordered to patrol the entire European quarter to guard against the possibility of further disturbances during the anticipated heated controversy at the Congress.

To Repair Cables

May Take Two Years For French Cable Company To Repair Breaks

Paris.—Two years may be required to repair fully the damage caused to the three French Cable Company lines broken by submarine earthquakes off Newfoundland, November 18.

The three cables were apparently broken in several places. Engineers on the cable repair ship estimated that 150 miles of new cable would have to be laid to replace the torn and twisted sections. The cost probably will be about \$400,000.

Little Demand For Raw Silk

Tokyo, Japan.—As a result of the lack of manufacture of rayon and various other silk substitutes, the consumption of raw silk in Canada and the United States, is considerably less than formerly, according to reports submitted to the Silk Association. Consumption of raw silk in the United States during the month of September showed a drop of 6,430 bales from the month previous.

May Be President Of Club

London, England.—The report persists that the Prince of Wales, who, early in the New Year, became president of the Bachelors' Club, of which he is already a member. Should he accept, it would obviously confirm his position as a man of no ordinary social status, but continuing to enjoy the blessed state of matrimony in the immediate future.

Christmas Ship Disaster

Twenty-Four Lives Lost Off Coast Of Spain

London, England.—A ship disaster in which 24 lives were lost marked a Christmas Day of tempests along the coasts of the British Isles, France and Spain.

A Norwegian steamship, bearing codfish from Iceland, sank off Bayona, northwestern Spain, after terrific gales forced it aground. The ship was bound for Vigo, nearby.

At 1 a.m. fishermen on shore saw a heavy fog prevailed, and the storm was so severe that fishing smacks in the inner harbor were damaged, the fishermen struggled to reach the battered vessel. After two hours they approached within 700 yards of the doomed steamer, but could not get closer.

The stricken vessel sank with all hands. Later four bodies were washed ashore, all wearing life-preservers marked "Amland." Letters and other documents came up by the waves. It was believed the ship carried a crew of 24. No survivors were found.

Lloyd's which received an account of the shipwreck, believed the ship's name to be "Ashaug" instead of "Amland." The "Ashaug" was listed as of 990 tons.

The storm blew out of the southwest, banishing the blue skies and sunny weather of Southern England. Rain fell in torrents and hail rattled on the streets of London, England, while wild weather ruled the south coast districts, where Christmas visitors to the coast were met by a great sea pound on the beaches and harbor walls at Folkestone and other ports.

Search For Missing Aviators

Canadian Pilot Arrive In Alaska On Way To Siberia

Seward, Alaska.—Carrying three Fairchild planes and a complement of Canadian flyers who are to engage in the search for Pilot Carl Ben Eielson and Mechanic Earl Borland, missing since early November, in Siberia, the coast guard cutter "Cheilan" has arrived here.

It fought its way through heavy weather all the way north. The Canadian flyers aboard were Captain W. A. Oakes, in charge, Captain T. M. "Pat" Reid, chief pilot, W. B. Wroath and Clifford Swartman, C. P. Mews and William Hughes, mechanics; Major H. C. Decker, in charge of the expedition for the aviation corporation, and A. E. Baker, A. Pratt and Whitely, mechanics.

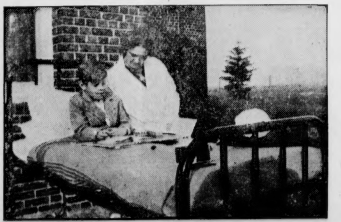

ANGLO-AMERICAN NAVAL PROGRAM SATISFIES JAPAN

Paris.—A new school of thought—that France should lay claim to London, to a larger navy than those of the United States or Japan, and second only to Great Britain—has developed in certain circles here. It is unlikely that the French delegates to the five-power conference will make such a claim, but the popular sentiment must be considered when France contemplates any sacrifices around the conference board.

The claim is based on the contention that France is a greater colonial empire than the United States or Japan, which now outrank it as to naval ratios, and has a greater area and population of overseas possessions to protect.

Tokyo.—Baron Shidehara has informed the cabinet and council. It is understood that the Japanese government has instructed its delegation to the London arms conference to support a program of Anglo-American naval solidarity, if the attitude of Italy and France make this necessary.

A UNIQUE SCHOOL ROOM

Above is a picture of the teacher and one of the pupils at the Junior Red Cross Crippled Children's Hospital at Edmonton. All the children are bed-ridden but continue their studies during the (sometimes very lengthy) time they are in hospital. In fine weather the beds are moved outside and work goes on in the fresh air and sunshine.

AWARDED FELLOWSHIP

D. D. "Don" Buchanan, son of Senator W. A. Buchanan, of Lethbridge, Alta., in his senior year of modern history honors at Victoria College, University of Toronto, who has been awarded the William E. Wilder fellowship for study abroad.

Fire In White House

Damaged By Blaze

Washington, Dec. 24.—By a sudden furious Christmas Eve fire, President Hoover's executive offices at the White House were ice-coated and desolate.

Summoned from the dinner table, Mr. Hoover was one of the first to reach the streets of London, England, while wild weather ruled the south coast districts, where Christmas visitors to the coast were met by a great sea pound on the beaches and harbor walls at Folkestone and other ports.

It fought its way through heavy weather all the way north. The Canadian flyers aboard were Captain W. A. Oakes, in charge, Captain T. M. "Pat" Reid, chief pilot, W. B. Wroath and Clifford Swartman, C. P. Mews and William Hughes, mechanics; Major H. C. Decker, in charge of the expedition for the aviation corporation, and A. E. Baker, A. Pratt and Whitely, mechanics.

Arrest Italian Extremists

Is Alleged To Have Plotted Death Of Royalty

Brussels, Belgium.—With the arrest of a young Italian in connection with an alleged murderous plot against the Belgian royal family, police expressed the belief they had caught the leader of a group of extremists who were active in Belgium and French secret agencies shadowed him several weeks. A man named Pasquale Pascholi, alleged to be the leader of his accomplices, was arrested simultaneously; but four other suspects, three Italian and one Dutch anarchist, are still at large.

Berneri is alleged to have headed a plot to bomb the Belgian royal train during the month of September. Berneri and his accomplices were arrested after the forthcoming marriage of Princess Marie Jose, of Belgium and Crown Prince Humbert, of Italy.

The authorities said that an extensive roundup of anarchists and other extremists probably would result from the evidence discovered with the arrests.

Will Publish Memoirs

New York.—The memoirs of the late Georges Clemenceau, wartime premier of France, will be published simultaneously in the United States, England and France, late in February or early in March.

Will Help Canadian Business

Two-Cent Letter Rate Extended To South America

Ottawa.—Christmas Day marked the inauguration of a two-cent letter rate from Canada to all parts of South America. Announcement to this effect was made by Hon. Peter J. Veniot, postmaster-general.

The letter rate already applied to all parts of North and Central America; and will now apply to the following countries: Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, the Guianas, Paraguay, Peru, Uruguay and Venezuela.

In making the announcement, Mr. Veniot expressed the opinion that the two-cent letter rate would result in considerable advantage to Canadian business. On this point the postmaster-general commented on the great natural resources of South America, its present-day development in transportation and its great trade expansion.

The South American countries, Mr. Veniot intimated, have been invited to reduce their letter rate to Canada, and thus make the arrangement reciprocal.

In addition, the postmaster-general declared, an agreement has been reached with the Argentine postal administration for the extension of the parcel post weight limit between Canada and Argentina from 15 pounds to 20 pounds. Such an arrangement, Mr. Veniot believed would facilitate trade with Argentina, as Canadian commercial interests would be able to ship in large quantities at lower rates than has hitherto been possible.

Trying To Locate Gold

Christmas Turkey Starts Gold Rush At Saint Me, Marie

Sault Ste. Marie, Ont.—A gold rush has started on St. Joe's Island and a dressed turkey spread the tip. It all started when a prominent merchant donated a number of turkeys for Christmas to deserving families.

Mr. J. B. Hammond, who dressed a turkey presented by the merchant, found in its crop a gold nugget valued at \$250. The turkey was one of a shipment from St. Joe's Island, and local prospectors are busy trying to find out just which farm this particular bird came from.

Brought Patients From North

"Funch" Dickens Again Aids Men Needing Medical Assistance

Edmonton, Alberta.—"Funch" Dickens, Western Canada Airways pilot, has brought his plane to Edmonton from McMurray on another "errand of mercy." His passengers, northland residents in need of medical aid, were Dick Dawson, mining engineer, who had suffered from an appendicitis attack; L. H. Forrest, a mine employee, who recently sustained a serious eye injury in an accident; and Fred Jones, who had his hand crushed while working on a drill.

CRITICISM IS HURLED AGAINST U. S. DRY BOARD

Washington, D.C.—Three more dry members of the senate have spoken their minds concerning present prohibition enforcement conditions.

Borah, of Idaho, Norris, of Nebraska, and Brookhart, of Iowa, all Republicans allied with the independent faction, entered the current controversy with expressions of dissatisfaction with existing enforcement agencies.

Borah, who as President Hoover's most prominent campaigner on the prohibition issue, assailed the entire prohibition program, was particularly effective, and asserted that as now constituted it would never enforce the law.

Borah, who supported governor Smith in the presidential campaign, declared that efforts to suppress the whisky traffic have never been made in good faith in numerous sections of the country. Enforcement officers, he said, have many times overlooked cases of men with political influence making fortunes through traffic in illicit liquor.

Borah came to the support of Senator Harris, of Georgia, in the latter's demand for the removal of Judge Paul J. McCormick, from President Hoover's law enforcement commission. Referring to McCormick's assertion that search of private homes without warrants was an outstanding evil of present enforcement activities, Brookhart expressed impatience "with making the government a criminal in enforcing the law and making heroes out of bootleggers."

UNIFIED BORDER PATROLS NOW PLANNED BY U.S.

Washington, D.C.—Plans for prohibition enforcement, which include a unified border patrol and limitation of the number of boats entering Canada, will be submitted by the treasury to congress as soon as a joint congressional committee to consider prohibition questions is named.

Under-Secretary Mills, who made the announcement, said the plan for a unified border patrol would require the consent of Canada because it will provide for limitation of the number of ports of entry to this country. In addition the plan, he said, will provide for an extensive border patrol under direction of the consular to prevent smuggling.

At present, the Under-Secretary added, a person coming from Canada may enter this country anywhere along the border, but must report his entrance at the nearest port. This required, he said, a patrol to work ten hours a day, and it was proposed that the new plan if approved by congress and Canada, the patrol would follow the exact border and prevent entry anywhere except at points designated.

Ottawa.—The "teeth" would be the official statement of the new plan if approved by congress and Canada, the patrol would follow the exact border and prevent entry anywhere except at points designated.

Ottawa.—The "teeth" would be the official statement of the new plan if approved by congress and Canada, the patrol would follow the exact border and prevent entry anywhere except at points designated.

Mount Ishbel

High Peak In Rocky Mountains Named After Daughter Of British Labor Premier

Ottawa.—A peak in the Rockies 10,000 feet in height, has been named Mount Ishbel, to commemorate the recent visit to Canada, when Miss Ishbel MacDonald made with her father, the British premier. The name was chosen by the British Labor party, standing body from those visible from Mount Louise District.

Announcement that Miss MacDonald's name had been perpetuated for all time in this manner, was made recently from the Department of the Interior.

Predicts Northern Railway

Line From Peace River To Great Slave Lake Certain, Says Colonel Cornwall

Edmonton, Alberta.—Construction of a railway line from Peace River to Great Slave Lake is predicted by Col. J. N. Cornwall, veteran northern railway engineer, by his comment on his way to spend the Christmas holidays in Victoria, B.C. "The northern development cannot be halted," he declared. "The region is one of the richest in the world, and its development will really begin when adequate railway transportation is provided."

Rescue Is Effect

London, England.—Exchange Telegraph dispatches from Ellington, New Zealand, reported the crews of two whaling expeditions sent out by the Royal Antarctic expedition had been rescued after their boats had been crushed in the ice. The news was received by the Byrd supply ship "Eleanor Bolling," by wireless. The "Eleanor Bolling" is now at Dunedin, New Zealand.

Made Long Hike

Guelph, Ont.—Plodding for 18 miles through the snow-filled road from Guelph, Ontario, to a tiny point seven miles below Arthur, Peter Peterson 80-year-old Arthur resident, has established a record for endurance. He had come to Guelph by train and returned to his home on foot although he had a return ticket in his pocket.

Starts Egg-Laying Contest

Charlottetown, P.E.I.—The twelfth annual Prince Edward Island egg-laying contest has been started with an entry of 240 birds. Fifty-nine of the entries come from stock that has laid 200 eggs or more averaging 24 ounces to the dozen.

Alterations of Berlin's network of canals are being planned to make it possible for 1,000-ton vessels to pass directly through the city.

I hope the ensuing year will bring to the citizens of this town and surrounding district an abundance of happiness. May good Health and Prosperity follow you all the days of 1930 and in the years to come.

Dr. S. R. McGregor

May this express our appreciation of the business entrusted to us during the year just ended and carry the wish that 1930 will prove for you a year of Happiness and Plenty.

JAMES LEES

Extending to the people of Oyen and District our sincere wishes that the New Year will bring them Prosperity, Health and Happiness.

Oyen Cartage and Transfer

W. D. Morrell

The Management of the Alberta Hotel extends to One and All, Best Wishes for Prosperity and Wealth throughout the New Year.

FOUR HUNGARY MAIDENS

Four New Canadians from Hungary whose native dances delighted thousands in attendance at the Regina Festival. From whatever viewpoint it is to be judged, the Great West Canadian Festival recently brought to a conclusion at Regina, was a success. In attendance it eclipsed its predecessor at Winnipeg last year. The exhibits covered a vast area, a more comprehensive representation of the people of the West had been arranged for and, in the words of Mr. McMillan, sponsor of the festival, "Shakatchewan has shown that within its borders is the foundation of an art upon which will be built a structure of national culture finer than that of any other nation on earth." Over a hundred folk-dancers interpreted the dances of many racial groups. Folk-singers numbered over one hundred and sixty. Handicrafts struck response from thousands and it is safe to say that next year's festival, which is already being planned, will receive still greater support and present a follow-up to be unequalled on the continent. The festivals have been arranged under the auspices of the Canadian Pacific Railway.

Hospital Closed

The Oyen hospital was closed yesterday, the nursing staff leaving for Calgary this morning. It is Dr. McGregor's intention to move from his present quarters into the hospital building and use same as an office and residence.

With the closing of the Oyen hospital, the question of hospital accommodation for the community once again is prominently brought to the notice of the ratepayers and residents of this district, and the problem of what is the best thing to be done is in their hands.

Two years ago a fair amount of enthusiasm was shown toward a municipal hospital, but the campaign petered out through lack of active interest. In some sections it was felt that the scheme was too elaborate and the cost too great. Others held the attitude that we had a hospital accommodation—so why trouble with municipal schemes? Our own personal opinion is that a district should own and control its own institution, and that it is not in the best interests of the community to have a local physician whose hours are usually filled looking after his practice, harassed with the additional worries of financing and operating a local hospital, on his own responsibility.

The matter of hospital accommodation is in the hands of the of the community.

Historic Chest

It is a surprise to visitors at the Dominion Archives at Ottawa to find that one of the most cherished possessions there is a modern-looking chest of drawers which is really over one hundred and seventy years old. It is a solidly built chest which was once the possession of the great general, the Marquis de Montcalm, who was placed in command of the Colonial troops at the beginning of the Seven Years' War and was mortally wounded at the battle of the Plains of Abraham in 1759.

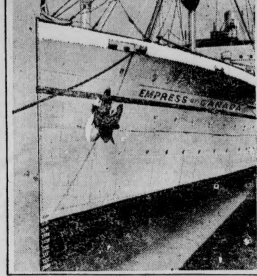

The chest stands about four feet high, is about five feet wide and about two feet deep. In spite of its great age it is in remarkably good condition. Three drawers are ornamented with heavy brass work and open with a three inch brass key. The catch is double requiring two turns to unlock the substantial drawer. The chest is supported on four large solid walnut claws.

The history of this treasure is a long one, beginning at the time when General Montcalm lived in Quebec City. The house he occupied was later taken by Sir Isaac Brock who purchased all the furniture which Montcalm had left. General Brock was later transferred to Upper Canada where he was in command of the forces during the war of 1812.

After his death at Queenston Heights, his possessions including the chest of drawers, were inherited by a family in Sherbrook, in the eastern townships of Quebec. From this family it was recently obtained by Sir Leicester Harmsworth who offered it to the Archives to be added to the Northcliffe collection which was presented to Canada by him in memory of his brother, Lord Northcliffe.

More than three hundred people from the west left Winnipeg for the Canadian Pacific Railway special travelling ship's side at St. John's to sail on December 16, to spend their Christmas and New Year holidays in Great Britain. The majority of the travellers represent workers on the land rather than city dwellers.

"White Empresses" to Call at Honolulu.

Honolulu, famous for its lovely Hawaiian dancers, its splendid-physiognomies, wreaths of flowers, Waikiki Beach and lovely Diamond Head

that flings its crest high in proud greeting or dignified farewell, is now to be added to the westward route of the famous Canadian Pacific liners—the White Empresses that long ago gained for Canada the Blue Ribbon for speed on the Pacific.

Starting December 7th from Victoria and Vancouver the Empress of Canada, which has just returned to service after being equipped with the fastest and most powerful engines on the Pacific, will inaugurate the new service and will call at Honolulu six days later.

Glimpses of some of the features of the "Island Paradise of the Pacific" are shown above, with (left) the giant prow of the 21,500 ton Empress of Canada. Behind the flower-decked maidens may be discerned the stately outlines of Diamond Head, famous in song and story. At the right is the Alaha Tower of the docks, that spells a Hawaiian welcome to the traveller.

Passengers to the Orient by the new Canadian Pacific service will be given the opportunity of staying over for the next ship or of paying a visit during the twelve hours the Empresses remain in Honolulu. Visitors to the Islands who plan to leave Jack Frost behind have many options for their return voyage. Several lines have co-operated with the Canadian company and, after a long busy winter on the sands of Waikiki Beach, travellers may return to Vancouver by the Canadian Australian Royal Mail Line direct, or may come back by a Matson Line steamer to Portland, Seattle or San Francisco, or to Los Angeles by the Los Angeles Steamship Company.

Do We?

We can worship God in our home Sundays. Do we?

We can worship God in the woods and in the fields. Do we?

We can worship God on the road in the auto. Do we?

We can worship God in a different church each Sunday. Do we?

We can worship God in our lodge and neglect the church. Do we?

We can worship God by sending the children to Sunday School and staying at home. Do we?

We can worship God by going to church and taking the children with us. Do we?

We can worship God by being loyal to the church and what it stands for. Do we?

The total forest area of Canada is estimated to be 1,151,454 square miles. Of this area, 842,800 square miles are productive and accessible. A little over one-fourth of this area bears the character of merchantable size; the remainder carries young growth not yet suitable for use.

The all-time championship in the Canadian Pacific Railway First Aid Competition has been won by the police team of the Windsor station Montreal for the first time in the history of the championship. Winners took 315½ points out of a possible 425, the nearest to which was the team from Nelson being 248½. Members of the winners were Owen Tomlinson, William Peterson, Ernest G. Wykes, William H. Allison (Captain), and Andrew H. Stitt.

Possibility Of Developing Copper Mines In Far North Sketched By Major Burwash

The possibilities of developing copper mines in the far north, seen along the shores of Bathurst Inlet, according to Major L. T. Burwash, who returned to Ottawa after having spent eighteen months on a trip through the sub-Arctic which took him some 4,000 miles by boat, behind a dog team and by sled.

The veteran of the north, who has mushed behind dogs since 1897, followed with him news of the latest developments in the country which he has grown to know like a book. He thought that the mineral prospects on the Coppermine River, up which he travelled for some fifty miles, would be less valuable than those along the shores of the inlet for which the following explorers of Col. C. D. H. McAlpine were making at the time they became lost.

Despite all the Coppermine River, he explained, had been brought in by the ice drift and had been left high and dry at all over the shores. During his trek up the river he picked up large chunks of metallic copper which had been left on the shore by the ice. He said, and the field cannot be developed until someone has been torn by which the huge nuggets were from the ice.

On Bathurst Inlet, however, the copper is in place, he said, and probably exists in great quantities.

Major Burwash was a trifle non-committal on the question of whether or not the development of the copper mining industry in this part of the country might some day reach a stage here that would justify the engineering of a railway from Churchill, 500 miles west, to take care of it.

He thought, however, that the development over large ranges of mountains, it would be cheaper to smelt ore on the ground, so close to the find all along the Arctic coast of Canada and occurs in heavy deposits at such points as Smoking Mountains and a part of Banks Island where it has been burning since the dawn of history in this region.

Water power is plentiful near the Arctic coastline, at least in a potential state. Most of the rivers flowing into the Arctic, the major explaining found of the Interior and even extending to the last fifteen or twenty miles of their courses, drop sometimes several hundred feet to a sea level in a stretch of rapids or cascades in which are splendid natural power sites.

Major Burwash, under orders of the Northwest Territories Branch of the Department of the Interior, started his trip on the well travelled route from Fort McMurray down the Mackenzie Valley to Atkasik on board the "Pitman gun." From there he worked east where he took a dog team and travelled along the coast as far as Boothia Peninsula and the magnetic pole. After making some observations on the pole, the compass and dipping needle he came to the conclusion that the centre of magnetism is deep down in the earth. He explained that the horizontal needle was put out of action owing to the attraction downward through the earth, while the dipping needle, giving the inclination of the magnetic lines for force in the vertical plane was standing almost straight up and down.

From Boothia the Major worked his way back via King William Land and was finally picked up at Burnside River by Captain Guy H. Blane, who had arrived on a search light for the Mackenzie search operations and, during the long flight down, acted as navigator for the planes.

Practically all the important European capitals are served by one or more air lines.

Seventy of the 92 known elements of which universe is made are metals.

"How is it you ask me for a loan when I don't know you?" "I would be helpless if you did,"—Nagels Lustig Welt, Berlin.

The Parisian's Hobby

French People Revel in Any Kind Of Exhibition

If a Parisian has a hobby it is his exhibitions. He revels in them. They come and go in a kaleidoscopic manner. There are the Spring and Autumn Salons for the painters and sculptors, the Automobile Salon in the fall, the Salon in the Jeu de Paume, the Fall Salon in the Grand Palais, the Salon de la Marine, the month of September. And now at last there is a Winter Sports Exhibition.

Paris has never any snow and it is seldom cold enough for the lake in the Bois de Boulogne to freeze over. But all the same it is now the correct time to go in for winter sports, so Parisians are for them without snow or ice but with an abundant supply of sporting clothes, skates, skis and sledges.

The Winter Palace in the rue des Sablons was opened recently in warm sunny weather. The snow is braced. On one side of the rink there is a ski and a toboggan platform. Alpine soldiers, Norwegian, Swedish and Savoyards glide swiftly down the run into the middle of the Exhibition Palace must once running into the spectators on the side lines.

The object of the Salon is to boom the French winter sports. It is the Touring Club of France, not to mention the French railways, including the military ski clubs, of sporting equipment and costumes. The French winter sports are a national but a very practical people.

Grading Milk On Quality

Producers Of High Grade Milk Will Gradually Eliminate The Careless Handler

Producers, dealers and consumers of milk for the most part realize the justice of the principle of valuing this product according to its quality. While payment on a grade basis is regarded as the quickest method to obtain improvement, and the easiest means of obtaining quality, it is a high level, yet even where no difference in price exists the producer of the high grade milk benefits through the gradual elimination of the careless handler who constantly fails to meet the standard set.

This question of grading milk for city trade is discussed at length in Bulletin No. 123 of the Department of Agriculture at Ottawa, by the "Packer's Bulletin" Messrs. Johns and Lockhart who hold the view that the production of milk for city trade is becoming more and more a specialized line in which a knowledge of the details concerning the production of a high grade product is a necessity. No article of food, they claim, has such a direct relation to the Nation's health, and the public are quite with in their rights in demanding that the old-time dairymen should develop habits and limited knowledge of sanitation give way to the better trained, more careful producer.

The Quarter Horse

A lot of fellows have ambition to spare and at the beginning of a job, but they are not to be given horses and are out of the race at the first turn. A young fellow who has dabbled in a dozen occupations, is smart choice for each of them, is going to be on the lookout for another one soon, and it is even money that he fails in that. The youngster is fortunate who knows what he wants to do, prepares to do it, and has the nerve to stay with it until he can do it.

Winnipeg May Have New Industry

Inquiries have been made by prominent American business interests as to the possibilities of the establishment of a factory in Winnipeg for the manufacture of articles in which alloys and is largely used.

Latest in Locomotives

The new 2500 class locomotives now being placed in service by the Canadian Pacific Railway mark yet another forward step in the history of the locomotive.

These locomotives, ten of which are being built for fast passenger schedules, are of the Hudson type and in type "E" superheaters are standard, and have cylinders and underframes cast in one solid piece, weighing about 30,000 pounds. The nickel boiler is designed to withstand a working pressure of 275 pounds, and the engine's tractive effort will be in the neighborhood of 45,200 pounds

Was Freeman's Mentor

Portrait of a man, likely Freeman's mentor.

Conference Held At Regina Reaches Decision To Continue Further Investigations

Experiments conducted during the past year into the use of fertilizer have been so successful, that the programme will be greatly extended during the coming season, with a view to determining at an early date possible, the soil types and areas on which fertilizer may be most profitably used. This decision was reached at a conference held at Regina, attended by representatives of the Consolidated Mining and Smelting Company, the Canadian Pacific Railway Company, the Massey-Harris Company, the Cooks River Company, the Dominion Government Experimental Farms Branch, the agricultural departments and universities of the provinces of Manitoba, Saskatchewan and Alberta, Dominion reclamation and irrigation branch, and the Manitoba Wheat Board, through whose co-operation the experiments were held.

France Keeping Her Horses

Country Has Made Good The Loss Sustained In War

The automobile is not replacing the horse in France, an official survey shows. The total number of horses in France this year is estimated to be nearly the same as in 1913, when the automobile was not a serious menace to horsemanship.

The government survey shows that in 1913 there were approximately 3,200,000 horses in France. During the war millions of them were killed in the war while many were eaten for food.

The years following the war looked dark and it seemed for some time that the fields of France would no longer see any horses. It was thought only the rich could afford a horse and a riding season while the rest left over would be sought by the museums.

But the farmers of France have staged a great comeback. They refused to introduce tractors and instead started breeding new herds of horses. As a result France is now well furnished with horsemanship. It is also stated the quality is much better, and that more horses are being sold at an earlier age because the public demands more tender meat.

Horsemanship still remains a popular item in France and special butcher lines from the French metal horses heads over their doors.

That France intends to continue in the number of her horses is evident from last year's export and import figures. France imported 17,000 horses, and exported only 1,732.

Fox Farming Centre

Between 1,500 and 2,000 Foxes Now In Saskatoon Area

According to "The Hub," between 1,500 and 2,000 foxes constitute the present stock in the Saskatoon region, which is recognized as the centre of the fox fur industry of the prairie provinces. As the black fox is scarce in Canada, in 1928, the Saskatchewan fur captured the primary honors in competition with the best from Alberta, Saskatchewan and Manitoba.

Saskatoon is the head office of the Canadian National Fox Breeders Association (Saskatchewan section).

The Carnegie Hero Fund, established 25 years ago, has awarded 19 gold medals, 526 silver medals, and 1,700 bronze medals since that time.

The average person consumes his weight in food once a month, which amounts to 1,600 pounds a year.

Advocates Uniform Text Books To Be Used In Schools Throughout The Dominion

Experiments With Fertilizers

Conference Held At Regina Reaches Decision To Continue Further Investigations

Experiments conducted during the past year into the use of fertilizer have been so successful, that the programme will be greatly extended during the coming season, with a view to determining at an early date possible, the soil types and areas on which fertilizer may be most profitably used. This decision was reached at a conference held at Regina, attended by representatives of the Consolidated Mining and Smelting Company, the Canadian Pacific Railway Company, the Massey-Harris Company, the Cooks River Company, the Dominion Government Experimental Farms Branch, the agricultural departments and universities of the provinces of Manitoba, Saskatchewan and Alberta, Dominion reclamation and irrigation branch, and the Manitoba Wheat Board, through whose co-operation the experiments were held.

A similar conference was held at Regina, Sask., in 1928, when experiments conducted during the summer of 1928 were discussed.

Experiments of the past summer show clearly that the whole favorable results have been secured through the application of superphosphate and ammonium-phosphate. Although, due to the large number of experiments covering so wide an area, the results did not show increasing yields, it was pointed out that the experiments have been under way only for a period of two years and that this was insufficient time to warrant final conclusion.

Planning For The Poultry Congress

Canada To Be Well Represented At Congress, To Be Held In England, In July

United States poultrymen are taking a keen interest in the World Poultry Congress, to be held in London, England, next July. Not only are they preparing extensive exhibits of live birds and poultry industry equipment, but a large number of poultry keepers and their friends are planning to visit the show.

Arrangements for the trip have advanced to the extent of securing passage from Montreal, which has been learned by the National Poultry Council, provides not only a low cost of travel, but an opportunity to enjoy the thousands miles through the beautiful St. Lawrence River and the Gulf on their way to the open sea.

The Canadian Committee voted on the Congress, are busy in every province and assurance is given that they will be well represented. Practically all departments of the Congress and in places in the touring circuit, have been arranged through the Dominion and the Continent.

Difficulty Encountered By Social Workers

Find It Hard To Protect Self-Respect Of Poor

An experienced social worker was once asked what she found to be the greatest difficulty in trying to carry help into homes of poverty. Without hesitation she replied: "Not to break their self-respect." This is a delicate yet very practical consideration in such matters. Even the poorest and most unfortunate are entitled to their right of privacy. They may well be tempted at times to expect that the presence of a social worker in their intrusion, no matter how well meant, that the heart know it is being intruded upon.

See For Themselves

An Irish drill sergeant was putting a squad of recruits through the different movements. Try as he would he could get a straight line. Finally, in exasperation, he shouted: "What the matter with you? Can't ye line up! About 'fifty feet out and take a look at the line you've made!"

The Output of Automobile in Canada for the Ten Months of 1929, ended in October, exceeded by almost three per cent the total for the same twelve months of 1928, according to the Natural Resources Department of the Canadian National Railway.

Glow-worms are more brilliant just before dawn, than when the sun is at any other time.

Prophet that an interprovincial union of the provinces is the only way of overcoming serious ignorance of their own country prevalent among Canadian school children, not to mention the adult population, was put forward by Dr. J. T. M. Anderson, premier of Saskatchewan, in his address before a luncheon meeting of the Canadian Club, at the Royal York Hotel.

Following his speech, Premier Anderson told an interviewer that he had in mind, meeting, possibly to be made yearly, of officials of provincial departments of education. As a beginning, they would concentrate on achieving uniformity of history and geography text books used in Canadian schools, and on impressing teachers under the supervision with the importance of knowing all about Canada and passing it on to their pupils.

"It might even become reasonable to agitate for a single history and single geography text book to be used all over Canada," he said.

"But the main point is that teachers and pupils and the public generally get an opportunity to be informed and misinformed regarding the country they live in."

The usefulness of the past summer's work, which has been so well formed and misinformed regarding the country they live in."

The usefulness of the past summer's work, which has been so well formed and misinformed regarding the country they live in."

"It is a pleasure," he remarked, "to drift back to the scenes of my youth and get an opportunity to convey some information about Saskatchewan without being thought boastful."

Dr. Anderson, who has been in educational work, I have always felt that a great trouble in the Dominion is that we are not acquainted with each other.

"There are thousands in this province who do not know the name of the West and not much more about even their neighboring province. Quebec, Ontario, and the average teacher in the secondary schools knows very little about this country. Its size, resources, activities and peoples. I deeply hope that the various provinces will get together soon in a council of educating knowledge of our own country."

Dr. Anderson asserted that few Canadian children learned that the Dominion was larger than the United States, and 18 times larger than Germany, that it constituted 28 per cent of the area of the Empire and was the largest overseas Dominion, and was as large as the whole continent of Europe.

Although Saskatchewan has at least one, if not several, racial problems, he said, he was not going to be coming from Communism or Soviet. Recalling his early days as a school teacher in the district, he said he was often in the habit of pointing out the fact that the great majority of the former foreigners were now staunchly English.

For Student Aviators

A radio station is being built at Heston aerodrome which is to be used by flying instructors. Stationed there the instructors will watch student aviators go through their capers above the building. Instructions will be broadcast from the station to the student flyers above. The pupils' planes will be equipped with receiving sets.

Ottawa Winter Fair

The Ottawa Winter Fair, opened by Hon. W. R. McPhillips, Minister of Agriculture, on December 2nd, contained the largest display of livestock in the capital, while for the first time more than 300 of the finest hunting, middle and carriage horses in Eastern Canada were present.

See For Themselves

An Irish drill sergeant was putting a squad of recruits through the different movements. Try as he would he could get a straight line. Finally, in exasperation, he shouted: "What the matter with you? Can't ye line up! About 'fifty feet out and take a look at the line you've made!"

The Output of Automobile in Canada for the Ten Months of 1929, ended in October, exceeded by almost three per cent the total for the same twelve months of 1928, according to the Natural Resources Department of the Canadian National Railway.

Glow-worms are more brilliant just before dawn, than when the sun is at any other time.

"What have you done to yourself?" "None. I'm just advertising a new strapping apparatus."—Moeke, Vienna.

Biennial and Annual Sweet Clover

Biennials Have Producers Than the Annual Variety

In the growing of sweet clover for the biennial varieties have produced higher yields than the annual variety Hubam in Northern Ontario. The biennial sweet clover both white and yellow blossom varieties were sown side by side with the annual variety on clay loam soil which had been in potatoes the previous year. The rate of seeding was twenty pounds per acre both for the biennial and the annual varieties. The biennial varieties were harvested toward the end of July of the second year of their growth, and the annual variety early in September of the year it was sown. The biennial varieties grew much taller and yielded considerably higher.

While blossom root reached a height of sixty-one inches, and the yellow blossom forty-eight as compared with forty inches reached by the annual variety. Both varieties of the biennial gave yields of cured hay about two tons to the acre, the white blossom yielding 1,707 pounds in excess of the two tons; the yellow blossom gave about two tons and one-half. The return from the annual variety was a little better than one and one-half tons to the acre.

Producers Of High Grade Milk Will Gradually Eliminate The Careless Handler

Producers, dealers and consumers of milk for the most part realize the justice of the principle of valuing this product according to its quality. While payment on a grade basis is regarded as the quickest method to obtain improvement, and the easiest means of obtaining quality, it is a high level, yet even where no difference in price exists the producer of the high grade milk benefits through the gradual elimination of the careless handler who constantly fails to meet the standard set.

This question of grading milk for city trade is discussed at length in Bulletin No. 123 of the Department of Agriculture at Ottawa, by the "Packer's Bulletin" Messrs. Johns and Lockhart who hold the view that the production of milk for city trade is becoming more and more a specialized line in which a knowledge of the details concerning the production of a high grade product is a necessity. No article of food, they claim, has such a direct relation to the Nation's health, and the public are quite with in their rights in demanding that the old-time dairymen should develop habits and limited knowledge of sanitation give way to the better trained, more careful producer.

The Quarter Horse

A lot of fellows have ambition to spare and at the beginning of a job, but they are not to be given horses and are out of the race at the first turn. A young fellow who has dabbled in a dozen occupations, is smart choice for each of them, is going to be on the lookout for another one soon, and it is even money that he fails in that. The youngster is fortunate who knows what he wants to do, prepares to do it, and has the nerve to stay with it until he can do it.

Winnipeg May Have New Industry

Inquiries have been made by prominent American business interests as to the possibilities of the establishment of a factory in Winnipeg for the manufacture of articles in which alloys and is largely used.

Latest in Locomotives

The new 2500 class locomotives now being placed in service by the Canadian Pacific Railway mark yet another forward step in the history of the locomotive.

These locomotives, ten of which are being built for fast passenger schedules, are of the Hudson type and in type "E" superheaters are standard, and have cylinders and underframes cast in one solid piece, weighing about 30,000 pounds. The nickel boiler is designed to withstand a working pressure of 275 pounds, and the engine's tractive effort will be in the neighborhood of 45,200 pounds

WORLD HAPPENINGS
BRIEFLY TOLD

Official France mourns Emile Loubet, former president who died recently at the age of 91.

Diplomatic relations between Great Britain and Russia formally resumed after a lapse of more than two and a half years.

The Canadian and United States delegation to the millennial celebration of the Icelandic parliament will sail from Montreal, June 15, aboard the S.S. Montcalm.

The Portuguese Government has authorized 400 mills to import 100,000 tons of foreign wheat before June 1, 1930. The action was taken because of the small Portuguese crop.

A movement to erect a monument to the late Floyd Bennett as a token of Germany's gratitude for his heroism in attempting to rescue the Bremen trans-Atlantic fliers has been started.

The B.C. provincial government is distributing to the municipalities \$50,414 as their share of liquor profits for the six months ending September 30, and \$206,978 from parliamentary taxes.

Canada has registered with the League of Nations her agreement with the United States regarding the admission of civil aircraft; her agreement with Sweden exempting shipping from income tax, and her agreement between Canada, Cuba, the United States and Newfoundland relative to fisheries.

Despite rebates of \$250,000 within six months of users of gasoline for industrial purposes, Alberta's gas tax has produced a net revenue of \$1,326,000 between April 1 and November 20, government officials state. At least \$500,000 more is expected to be taken in by March 31, 1930, the end of the fiscal year.

Canadian National
Places Large Order

Will Do Much To Relieve Unemployment Situation in Canada

Orders have been placed by the Canadian National Railways for 120,000 gross tons of steel required for the construction programme of the National System during the coming year. It was stated officially at Canadian National headquarters. Of this total, 50,000 gross tons have been ordered from the Dominion Iron and Steel Company, and 40,000 gross tons from the Algoma Steel Mills, at Sault Ste. Marie. In addition to steel orders, nearly 5,000 box cars have been ordered. Of the car orders placed, the Canadian Car and Foundry Company are to deliver 2,500 fifty ton box cars, and 25 tank cars, each of 10,000 gallons capacity. The National Steel Steel Company have received orders for 1,175 fifty ton box cars, and the Astern Car Company have been given orders for 200 refrigerator and approximately 1,000 box cars. The placing of box car orders has resulted in the manufacturers placing orders with the British Columbia Mills for some 16,000,000 feet of box car material. The placing of these orders has been an important bearing on the employment situation throughout the centres concerned. Inquiries are being made by the Canadian National among the locomotive manufacturers for the delivery of 18 Santa Fe type locomotives and 15 mountain type engines.

To Prevent Seasickness

After 50 years of age, Dr. Sidney Jones has retired. He has published a preventative for seasickness based on a study of this illness during his life on the ocean. Take no alcohol a week before sailing, eat sparingly, and avoid all acids foods, is his advice.

"Back—Can you give me a definition of an orator?"
"Private—Sure. He's the fellow who's always ready to lay down your life for his country."

"You have painted your eyes very black."
"Yes, I am in mourning."—Esquimaux, Barcelona.

Status of Dominions

Conference Brings To Light Important Developments in Empire's Constitutional Position

Another important development in the Empire's constitutional position has resulted from the International Air Conference, just concluded at Paris. Britain and the Dominions, though they signed the 1919 international air convention separately, hitherto had no joint vote at the convention, despite sometimes conflicting interests. Now it has been unanimously agreed the Dominions have separate votes and the alteration is embodied in a protocol which the Dominions have signed in alphabetical order, with other nations.

New Colored Film Process

Swiss Company Is Formed To Exploit

A Swiss company has been organized to exploit a colored film process invented by the French scientist, Berthou. The price will not exceed that of ordinary film, it is said.

The invention, although not explained to the public, is understood to render colors possible by optical instead of chemical means, the color being registered by bands on each side of the film, as is the case of sound in 'talkies.'

Recipes For This Week

(By Betty Barclay)

CINNAMON APPLES SUPREME

- 1 package vanilla junket.
 - 1 pint milk.
 - 6 apples.
 - 1 cup sugar.
 - 1/2 cup water.
 - 3 tablespoons red cinnamon candies.
 - 1 tablespoonful lemon juice.
- Peel and core apples and place in baking pan. Make a syrup by boiling the sugar, water and cinnamon candies together for 5 minutes; add lemon juice. Pour syrup over apples and bake until tender, basting several times. Place apples in individual dishes, adding a little syrup. When cooled and the syrup has jelled, prepare vanilla junket according to directions on package and fill dishes. Let stand in a warm room until firm.

POTATO STUFFING FOR ROAST

- 2 cups hot mashed potatoes.
 - 1 teaspoon grated onion.
 - 1/2 cup chopped walnut meats.
 - Paprika.
 - 1 teaspoon salt.
 - 1/2 cup evaporated milk.
 - 1 tablespoon butter.
 - Yolks 2 eggs.
 - 1 teaspoon of poultry seasoning.
- Mix the ingredients in the order given and handle as usual.

A Good Gardener

Saskatchewan School Teacher Wins Silver Cup For Improvement To School Grounds

Michael Evashchenko is a school teacher. For three years a silver cup has been awarded by the Canadian Horticultural Council, of Saskatchewan, for greatest improvement in school grounds during the year. Each time a school taught by Evashchenko has won the cup which was donated for the purpose by Prairie Nurseries, Limited.

Announcement of this year's winner was made at Saskatoon by A. K. Brown, director of rural education for Saskatchewan. The cup goes to the Krasny school district No. 1121, 12 miles south of the city. Last year the cup was won by the Winhart school, north of Punnichy, and in 1927 by Janusz school, 16 miles northeast of Prince Albert. Evashchenko, a teacher at all three schools, having spent a year in each place.

He is a native of Manitoba, attended school at Dauphin, and took his class normal work in Manitoba. He won his second class at Saskatoon, and spent a year at the Agricultural College.

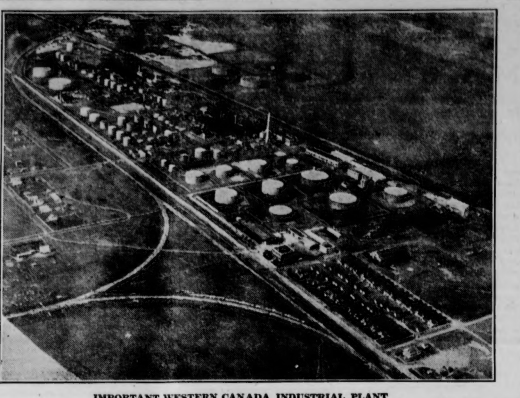

Cactus That Shoots

Dr. E. C. Leonard, Smithsonian Institution scientist, tells of a thorn-shooting cactus, of Haiti. The slightest touch to the bush will cause the cactus pads to shoot forth in a parabola several sharp thorns. These travel with considerable force, and can penetrate leather at a distance of six feet.

His Worry

A business man returned from the city to find the maid looking scared. "I'm sorry, sir," she said, "but madam had an accident in the car this afternoon, and she's been completely smashed. 'Good lord,' said the agent husband, 'and my clubs were in the ditch!'"

The battle of Waterloo lasted only about eight hours.

IMPORTANT WESTERN CANADA INDUSTRIAL PLANT

One of the Western Canadian industrial plants, the refinery of Imperial Oil, Limited, at Regina, Saskatchewan, which supplies gasoline and oils for Western Canada consumption.

Times Have Changed

People Too Used To Modern Improvements To Make Good Pioneers

It is almost invariably advanced in arguments regarding aid to immigrants that the latter have greatly deteriorated since the pioneer days of Canada when men and women invaded the wilderness with practically no resources and there hewed out homes and estates for themselves. Regardless of how the comparison may rebound to the credit of the first settlers, it is of no help in solving the problem of colonization in Canada today. When this country was making its first bid for population the whole situation was parallel. Everybody was the same footing. There were no millions, there was little luxury of any kind, no railways, no theatres, not even decent roads. The job ahead of the settler was to plunge in to the wilderness and take the chance that others were taking. There were no distractions of ease or pleasure. The game was to eke out an existence under very difficult conditions, but equality was consequent. Today all the human beings that we can draw upon as colonists have seen something of comfortable existence, of motor cars, of railway trains, of luxurious homes, of fine hotels and theatres. They have witnessed the spectacle of a large percentage of other human beings go through life without engaging in grinding toil. It cannot be wondered at that they shrink the onerous task of tackling existence at the bottom. The environment has made that look like a waste of time and effort. Everyone hopes, in some way, to beat out the primitive methods of gaining a livelihood.

The Quality Of Mercy

Good Work Of Red Cross Society In Saving Eyebright Of Afflicted Child

In that far north land where the aeroplane is taking its mail today and linking the regions beyond with the centres of civilization, there lived a little child with a pair of beautiful bright eyes. Tragically stalked in the little girl one unhappy day, for she had the great misfortune to hurt herself with a pair of scissors while playing. Her eye was injured in the moment and in much pain the child had to endure the smarting ache. Anxious her mother did what she could in first aid treatment, and to all appearances the eye healed up.

Two months later it was observed that the little girl was groping her way along, and in great dread the doctor was sent for. In that far north land medical aid is difficult to obtain. Hearing of the distress of the home, the Red Cross nurse hurried to see the child. The worst fears were realized, the child was evidently going blind. There was one hope, that with immediate care the other eye could be saved, but there was a long and tedious and most costly journey to be made to the distant city of Edmonton, where eye specialists could be consulted. Communications with Headquarters of Red Cross in the capital city resulted in transportation to the sufferer. The sight of one eye had gone, but with immediate care and treatment, the other eye could be saved. Twice blessed is the work of the Junior Red Cross in extending mercy to the suffering child.

Loganberries were produced by crossing raspberries and blackberries.

Mid-Atlantic
Airports Scheme

Artificial Islands Look Like Great Ironwork Piers

The idea of making a series of islands across the Atlantic as landing places for aeroplanes carrying passengers that will one day fly the air between this continent and Europe has for long been the basis of romantic schemes. One such scheme is about to come true, and when it does, there will be eight floating islands between New York and Southampton, forming great stepping stones for the use of aircraft on regular scheduled flights. These artificial islands are part of the equipment of a concern soon to exploit trans-Atlantic air service. The islands are known as Armstrong aerodromes, after their inventor. Construction on them will begin this year. They will be anchored 400 miles apart, and will be landing ports for machines which expect to carry travellers from the United States to England or France in 16 hours.

Seen out the water, the aerodromes look like great ironwork piers. But they will float instead of stand. Thirty-two "legs" will support the aerodromes which will be 1,100 feet long, 400 feet wide and 250 feet high. The floating airports will be 80 feet above water, out of reach of the largest waves. The inventor says the peculiar construction will prevent all rolling or pitching. A hotel will stand on each island. The aerodromes will be the regular construction will prevent all rolling or pitching. A hotel will stand on each island. The aerodromes will be the regular construction will prevent all rolling or pitching. A hotel will stand on each island.

Killed By Chinese Bandits

Three Missionaries Are Slain In Most Revolting Manner

The Rev. James G. Keller, superior of Maryknoll Junior seminary, at Los Altos, Calif., told the Associated Press that he had received by mail a letter from a Chinese man, recently, of three Franciscan missionaries, Bishop Jans and Fathers Bruno and Rupert. Father Keller said the missionaries were killed in a most revolting manner, Bishop Jans being literally hacked to pieces. The clergymen were captured by bandits. The death of these missionaries, Father Keller said, brings the total number of Catholic priests killed in China recently, to 22.

World's Largest Market

Smithfield Market, in London, England, said to be the largest meat market in the world, is shortly to celebrate its sixty-first anniversary. Some idea of its capacity can be had in the fact that 4,000 tons of beef, the equivalent of 60,000 dishes, can be displayed at one time. More than 150 firms are contained in the building. In December, 1929, 20,568 tons of beef were handled there.

George Washington never lived in the White House. This edifice was not yet completed when he died.

The food of oysters consists chiefly of microscopic plants which are carried to them by the currents.

WINDOLITE

The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH.

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic in the sun's rays.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passing of Ultra-Violet rays, but that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely solved the long-felt want. Exhaustive experiments have conclusively proved that WINDOLITE is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial influence on the growth and development of plants and chickens and cattle, as well as of man, enabling for the first time to have healthy light instead of darkness in their shade.

Indeed, the discovery of WINDOLITE during the last six years completely revolutionized the old-fashioned idea of ventilation by window breeding, increasing the egg-yielding of hens, and the production of healthy, improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light last strong windows for cattle shade, dairy sheds, poultry houses, and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold and wet, cracks or chips—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length and in the widths of 3, 4, 5, 6, 7, 8, 9, 10, 12, 14, 16, 18, 20, 24, 30, 36, 42, 48, 54, 60, 72, 84, 96, 108, 120, 144, 168, 192, 216, 240, 270, 300, 324, 360, 396, 432, 468, 504, 540, 576, 612, 648, 684, 720, 756, 792, 828, 864, 900, 936, 972, 1008, 1044, 1080, 1116, 1152, 1188, 1224, 1260, 1296, 1332, 1368, 1404, 1440, 1476, 1512, 1548, 1584, 1620, 1656, 1692, 1728, 1764, 1800, 1836, 1872, 1908, 1944, 1980, 2016, 2052, 2088, 2124, 2160, 2196, 2232, 2268, 2304, 2340, 2376, 2412, 2448, 2484, 2520, 2556, 2592, 2628, 2664, 2700, 2736, 2772, 2808, 2844, 2880, 2916, 2952, 2988, 3024, 3060, 3096, 3132, 3168, 3204, 3240, 3276, 3312, 3348, 3384, 3420, 3456, 3492, 3528, 3564, 3600, 3636, 3672, 3708, 3744, 3780, 3816, 3852, 3888, 3924, 3960, 3996, 4032, 4068, 4104, 4140, 4176, 4212, 4248, 4284, 4320, 4356, 4392, 4428, 4464, 4500, 4536, 4572, 4608, 4644, 4680, 4716, 4752, 4788, 4824, 4860, 4896, 4932, 4968, 5004, 5040, 5076, 5112, 5148, 5184, 5220, 5256, 5292, 5328, 5364, 5400, 5436, 5472, 5508, 5544, 5580, 5616, 5652, 5688, 5724, 5760, 5796, 5832, 5868, 5904, 5940, 5976, 6012, 6048, 6084, 6120, 6156, 6192, 6228, 6264, 6300, 6336, 6372, 6408, 6444, 6480, 6516, 6552, 6588, 6624, 6660, 6696, 6732, 6768, 6804, 6840, 6876, 6912, 6948, 6984, 7020, 7056, 7092, 7128, 7164, 7200, 7236, 7272, 7308, 7344, 7380, 7416, 7452, 7488, 7524, 7560, 7596, 7632, 7668, 7704, 7740, 7776, 7812, 7848, 7884, 7920, 7956, 7992, 8028, 8064, 8100, 8136, 8172, 8208, 8244, 8280, 8316, 8352, 8388, 8424, 8460, 8496, 8532, 8568, 8604, 8640, 8676, 8712, 8748, 8784, 8820, 8856, 8892, 8928, 8964, 9000, 9036, 9072, 9108, 9144, 9180, 9216, 9252, 9288, 9324, 9360, 9396, 9432, 9468, 9504, 9540, 9576, 9612, 9648, 9684, 9720, 9756, 9792, 9828, 9864, 9900, 9936, 9972, 10008, 10044, 10080, 10116, 10152, 10188, 10224, 10260, 10296, 10332, 10368, 10404, 10440, 10476, 10512, 10548, 10584, 10620, 10656, 10692, 10728, 10764, 10800, 10836, 10872, 10908, 10944, 10980, 11016, 11052, 11088, 11124, 11160, 11196, 11232, 11268, 11304, 11340, 11376, 11412, 11448, 11484, 11520, 11556, 11592, 11628, 11664, 11700, 11736, 11772, 11808, 11844, 11880, 11916, 11952, 11988, 12024, 12060, 12096, 12132, 12168, 12204, 12240, 12276, 12312, 12348, 12384, 12420, 12456, 12492, 12528, 12564, 12600, 12636, 12672, 12708, 12744, 12780, 12816, 12852, 12888, 12924, 12960, 12996, 13032, 13068, 13104, 13140, 13176, 13212, 13248, 13284, 13320, 13356, 13392, 13428, 13464, 13500, 13536, 13572, 13608, 13644, 13680, 13716, 13752, 13788, 13824, 13860, 13896, 13932, 13968, 14004, 14040, 14076, 14112, 14148, 14184, 14220, 14256, 14292, 14328, 14364, 14400, 14436, 14472, 14508, 14544, 14580, 14616, 14652, 14688, 14724, 14760, 14796, 14832, 14868, 14904, 14940, 14976, 15012, 15048, 15084, 15120, 15156, 15192, 15228, 15264, 15300, 15336, 15372, 15408, 15444, 15480, 15516, 15552, 15588, 15624, 15660, 15696, 15732, 15768, 15804, 15840, 15876, 15912, 15948, 15984, 16020, 16056, 16092, 16128, 16164, 16200, 16236, 16272, 16308, 16344, 16380, 16416, 16452, 16488, 16524, 16560, 16596, 16632, 16668, 16704, 16740, 16776, 16812, 16848, 16884, 16920, 16956, 16992, 1930

We take this opportunity to express our thanks for your confidence and patronage during the year just closed. On the threshold of the New Year we extend to you and yours our sincere good wishes for Health and Happiness throughout 1930, combined with greater Prosperity.

Johnson's Garage

and Staff

1930

In extending our wishes for 365 days of Prosperity and Happiness in the New Year we desire to add our sincere thanks to those who have favored us with their business during 1929.

J. J. Purcell

and Staff

We look back with pleasure to the happy business relationships we have enjoyed during the past year and express the hope that 1930 will bring Prosperity to the people of Oyen and District.

J. P. Kerr, V.S.

We're Off

to a new start in a New Year. May it prove the Best you have ever known.

CHAS. P. SNYDER

1930

May we express our appreciation of the Goodwill we have enjoyed during the year just ended and the business entrusted to us, and extend to one and all our sincere wishes for your Success, Happiness and Health throughout 1930—May it prove a very Prosperous year for you.

E. D. THYGESEN

"Agent for the Best"

About Town and Country

On and after January 1st, 1930, our business will be conducted on a strictly cash basis.—The People's Meat Market.

A whist drive and dance will be given in the Masonic Hall, Oyen, on Friday, January 24, under the auspices of Somme Chapter O.E.S. All welcome.

Mr. Paul Ozmut, of Arason, Alta., spent the Christmas holidays in town.

Mr. Frank Todd, now of Pollockville, spent the Christmas holidays in town.

Milder weather has prevailed during the past week. The temperature swinging between 10 above zero to 38 above zero, the low point being only touched once and the average temperature for the week being about 28.30 above during the daylight hours.

Mr. J. P. Quinn arrived in Oyen Christmas morning to spend the holidays here.

Mr. Roy Notman who recently left Oyen for Craigville, was a Christmas Day visitor at the home of Mr. and Mrs. James Marshall.

Mr. Eric Sharp of Scotfield, Alta., spent the Christmas holiday in Oyen.

Mr. T. M. Nunn, who has been up in the Hudson Bay country on construction work with the C.N.R., is spending a holiday with his family in Oyen.

Mr. and Mrs. J. W. Gale, who arrived in Oyen last Sunday are the guests of Mr. J. J. Kelly.

Mr. S. E. Trowin left last Sunday for Hardisty, being called there by the serious illness of his sister. Word was received by Mrs. Trowin, that she died the following day and the funeral took place yesterday, December 31, 1929.

Further flooding of the skating rink will be done before it is opened to the public.

IN LIGHTER VEIN

"Have you seen Norah's new evening frock?"

"No, what does it look like?"

"Well, in many places it's very much like Norah—Montreal Star."

How sad it is so soon to lose. Those sweet pre-nuptial thrills; Behind us are the dove-like coos; Ahead of us the bills.—Judge
